REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-8 are considered allowable since when reading the claims in light of the specification none of the references of record alone or in combination disclose or suggest the combinations of limitations specified in the independent claims. As to claims 1-6 and 7, the prior art of record does not teach a link-managing unit operable to update the priority of each of the packets transmitted from the terminal when a link condition of the terminal changes, the priority of each of the packets is included in the communication information stored in the communication-managing table, wherein each of the terminals is configured to couple to at least another of the terminals through the relaying device, such that when one of the terminals is removed, the link condition changes and the link managing unit is operable to update the priority of the packets, transmitted from the one terminal, from a previous priority value associated with the one terminal before the link condition changed to a new priority value.

As to claim 8, the prior art of record does not teach updating the priority of packets transmitted from the terminal when a link condition of the terminal changes, including the priority in the stored communication information, and updating a priority value of the terminal from a previous priority value associated with the terminal before the link connection changed to a new priority value, wherein each terminal is configured

to couple to at least another of the terminals through a relaying device, such that when one of the terminals is moved the link condition changes. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
